2. Reasons for differential

Consolidated interim period

Overall consolidated net sales and income were higher than forecast, mainly due to positive trends in ATTENIR and boschia, and higher-than-expected sales in the core cosmetics and nutritional supplements businesses due to stronger-than-expected inbound demand, in addition to revisions to the period of use of marketing costs.

Full-year consolidated forecasts remain unchanged from those announced on April 27, 2017, for reasons including the need to closely observe movements in the third quarter at the peak of the sales season as well as ongoing trends in inbound demand, along with the possibility that additional advertising investments will be implemented with the aim of strengthening the foundations for growth in the next fiscal year and beyond.
